# Lennard Vicente

Atlanta, GA | (678) 735-8916 | lennardvicente@gmail.com | LinkedIn | GitHub

## Skills

**Front End Development:** HTML, CSS, JavaScript, React, Redux, TypeScript, Bootstrap, Tailwind, Docker
**Back End Development:** Node, Express, Java, Python
**Databases:** MySQL, MongoDB, AWS DynamoDB

## Experience

**Software Developer,** Revature – Reston, VA                                              April 2023 – October 2023
- Designed responsive user interfaces using React by collaborating with design and development teams to ensure visually appealing and user-friendly software solutions
- Developed scalable and efficient applications by leveraging expertise in JavaScript and TypeScript, resulting in enhanced performance and user experience
- Participated in Agile/Scrum ceremonies, contributing to sprint planning, daily stand-ups, and retrospectives to support team collaboration and project management
- Conducted comprehensive unit testing using Jest with 95% code coverage to ensure robust and reliable code
- Integrated third-party APIs and services to expand application capabilities and improve operational efficiency

**Software Developer,** 100Devs – Los Angeles, CA                                              Jan 2022– March 2023
- Developed and implemented responsive user interfaces using HTML, CSS, and JavaScript, collaborating closely with the design team to ensure intuitive and visually appealing designs
- Designed and executed backend APIs using Node and Express, facilitating seamless data communication and enhancing the functionality of web applications
- Collaborated with cross-functional teams to optimize web application performance and security, implementing best coding practices using Git
- Optimized application performance by identifying and refactoring inefficient code, resulting in a 20% increase in speed
- Managed version control using Git, overseeing branching, merging, and resolving conflicts to maintain a clean and organized codebase

## Projects

**Expense Reimbursement System**                                                                            GitHub
- Developed a robust and scalable solution for organizations to effectively manage and streamline the reimbursement process, improving efficiency, accuracy, and compliance.

**Social Media Blog API**                                                                                    GitHub
- Developed a comprehensive backend solution for managing user accounts and messages, offering a solid foundation for building dynamic and interactive social media applications.

## Education

**Kennesaw State University, Kennesaw, GA** – Bachelor of Science in Electrical Engineering                May 2018
